

Topic Area: Immunization

IMM-1: Increase effective vaccination coverage levels for universally recommended vaccines among young children

IMM-1a: Four (4) doses diphtheria-tetanus-acellular pertussis (DTaP) vaccine by age 19 to 35 months

Target:	95 percent
Baseline: (Year)	87 percent (2011)
Data source:	National Immunization Survey, Centers for Disease Control and Prevention

IMM-1b: Birth dose of hepatitis B vaccine (0 to 3 days between birth date and date of vaccination, reported by annual birth cohort)

Target:	75 percent
Baseline: (Year)	47 percent (2011)
Data source:	National Immunization Survey, Centers for Disease Control and Prevention

IMM-1c: Four (4) doses of pneumococcal conjugate vaccine (PCV) among children by age 19 to 35 months

Target:	90 percent
Baseline: (Year)	84 percent (2011)
Data source:	National Immunization Survey, Centers for Disease Control and Prevention

IMM-2: Increase the percentage of children aged 19 to 35 months who receive the recommended doses of DTaP, polio, MMR, Hib, hepatitis B, varicella, and pneumococcal conjugate vaccine (PCV)

Target:	80 percent
Baseline: (Year)	74 percent (2011)
Data source:	National Immunization Survey, Centers for Disease Control and Prevention

IMM-3: Increase the percentage of non-institutionalized adults aged 65 years and older who have ever been vaccinated against pneumococcal infections

Target:	To be determined
Baseline: (Year)	Not yet available (2011)
Data source:	New Jersey Behavioral Risk Factor Survey, Center for Health Statistics, New Jersey Department of Health

IMM-4: Increase the percentage of non-institutionalized adults aged 65 years and older who are vaccinated annually against seasonal influenza

Target:	To be determined
Baseline: (Year)	Not yet available (2011)
Data source:	New Jersey Behavioral Risk Factor Survey, Center for Health Statistics, New Jersey Department of Health
